

#### SOLID BRASS BULLETS FROM L.O.S.

L.O.S. company started with the production of solid brass bullets machined on the swiss type CNC lathes, which are known for their precision and speed. Our solid brass bullets are environmentally friendly and designed for target shooters and hunters that look for extremely deep penetration as well as excellent terminal performance.

Bullets are turned from machining brass and they are designed with driving bands which decrease the pressure in the barrel.

We offer three different types/shapes of solid bullets:

- 1.) TACTIC
- 2.) HUNTER TACTIC
- 4.) HUNTER

Before we put any type of the bullets on the market, they are thoroughly tested to make sure to offer you the best available bullets from our production line. We are continually developing different bullets and are glad to receive any kind of feedback from our customers.

TACTIC (T)

HUNTER TACTIC (HT)

HUNTER (H)

Bullets are packed in small carton boxes 100pcs each.  
Large carton box contains 1200pcs (12 small boxes with 100pcs).
